Re: Proposed U.S. Patent Application
For: Integrated Transmission Bell Housing
Inventors: Tim T. Clark and Harry L. Schoell
Our Ref: 6935-0001

Dear Mr. Schoell:

This letter confirms our telephone conversation on February 9, 2004. You called our office after you received our letter dated February 5, 2004 and the enclosed patent application. Specifically, you called our office to discuss (a) the absence of any contract between you and your companies and our client, Rocketek; (b) your opinion that Tim Clark is not an inventor; (c) your opinion that you are the sole inventor and designer of the transmission; (d) the transmission was designed independent of Mr. Clark's input; and (d) that others believe that Clark is not an inventor. You also confirmed that you gave instructions to have Mr. Clark's car and boat towed from the property.

As we explained, the inventorship of the patent has nothing to do with the contractual relationship between you, your companies and Rocketek. Since you are the listed inventor on many patents, you know that the invention is defined in the claims of the patent application. During our conversation, you did not mention that Mr. Clark had nothing to do with the placement of components on the bell transmission housing. Accordingly, we confirm our earlier opinion that both Mr. Clark and you are inventors of this feature. You did indicate that Mr. Clark was not involved in the creation and design of the transmission. We agree with this statement as does Mr. Clark. He did not design the transmission.

It is clear to us that there exists serious business disputes between you and Mr. Clark including the removal of Mr. Clark's personal property. Furthermore, this business dispute is dominating all reasonable discussions as to whether Mr. Clark and you are joint inventors of the bell transmission housing disclosed and claimed in the patent application sent to you on February 5.

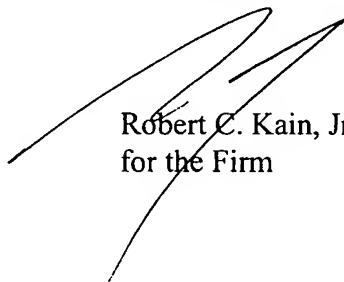

Mr. Harry L. Schoell

Page 2

During our conversation on February 9, 2004, we specifically asked you if you would sign the patent declaration sent to you with the proposed patent application on February 5. You indicated that you had the patent application because the transmission designs in the application were your designs. **You specifically informed us that you would not sign the patent declaration.**

Since the application must be filed on or before February 11, 2004 in order to preserve Rocketek's patent rights (the invention was placed on public display on February 11, 2003, one year earlier), we will file the application without your signature on the patent declaration and will file a petition in the Patent and Trademark Office to that effect.

Sincerely,

Robert C. Kain, Jr.
for the Firm
